Professional Development

Pine Creek School Division is committed to the ongoing training of staff of the division. To facilitate this training the division makes a variety of professional development opportunities available to the staff. Because of the importance of teachers continuing to learn and remain current with instructional practice we must minimize distractions, which might interfere with divisional professional development days. Therefore all school teams are prohibited from participating in extracurricular activities during professional development hours. Teachers will only be released to participate in other professional development activities or school related activities on divisional professional development days with the permission of the Superintendent.
